## SKILLS SUMMARY

---

- **Languages:** JavaScript, TypeScript, HTML, CSS, Bash, SQL, Java
- **Technologies:** ReactJS, NodeJS, ExpressJS, Angular
- **Databases:** MySQL, PostgreSQL, MongoDB, Mongoose, Firebase
- **Tools & Other:** GIT, GitHub, Postman

## EXPERIENCE

---

### Frontend Developer Intern

- Innover Labs June 2025 - Nov 2025
  - Crafted and engineered pixel-perfect user interfaces using **React, Express.js, and CSS**, ensuring they are both **visually appealing and highly functional**. Ensured **cross-browser compatibility** and **responsiveness** by leveraging a **component-based architecture** in React to create **reusable UI components**, thereby enhancing **development efficiency**.
  - Contributed to multiple projects by applying **best practices** in web design and coding standards. Utilized **Git** for **version control** to effectively manage code changes, collaborate with team members, and maintain a comprehensive **project history**.
  - Actively engaged in **product discussions**, collaborating closely with **senior developers, designers, and product managers** to thoroughly understand **business requirements**, brainstorm innovative ideas, and provide valuable **technical insights**.
  - Participated in discussions focused on **optimizing web application performance**, implementing **security measures**, and enhancing **search engine visibility**. Applied acquired knowledge to real-world projects, resulting in **improved application performance** and **enhanced security**.

## PROJECTS

---

### Avis Engineering – Providing NDT Services:

- Developed a full-stack business management system using React, TypeScript, and Firebase for an NDT services company
- Implemented GST-compliant billing, automated invoice generation, and financial analytics dashboard
- Built PDF document generation system for invoices, quotations, bills, and NDT test reports
- Created admin and client portals with real-time data synchronization and secure authentication
- Integrated payment tracking, company management, and client communication feature
- [see live](#)

### Sasta-mastaRide - Full-Stack Ridesharing Platform

- Built complete ridesharing application with React frontend and Node.js/Express backend
- Implemented user authentication (JWT), role-based access control (Riders, Passengers, Admins)
- Developed trip management system with search, booking, and real-time GPS tracking using Google Maps API
- Created in-app messaging system and push notifications using Firebase Cloud Messaging
- Built admin dashboard with analytics, user management, and financial oversight
- Tech Stack: React, Node.js, Express, MongoDB, JWT, Razorpay, Google Maps API, Firebase, TailwindCSS
- [see live](#)

### MSR Management - Enterprise POS & Inventory Management System

- Developed cross-platform desktop POS system using Electron.js, React 18, Redux Toolkit, and Node.js/Express.js
- Built three role-based portals (Shopkeeper, Distributor, Admin) with 30+ pages and POS system
- Created category-specific features: Medical (prescription management, Schedule H validation), Pesticide (farmer registration), Kirana (credit ledger)
- Developed RESTful API with 50+ endpoints, JWT authentication, 2FA, and audit logging
- Implemented real-time analytics with predictive inventory management and sales forecasting
- Integrated Firebase services for cloud capabilities and push notifications
- Added security features: two-factor authentication, session timeout, comprehensive audit trail
